

# Index

## PRELIMINARY

### A

architectural forms, 4-8

### C

CALS, 2-1

Content orientation, 3-1

content oriented coding, 3-1

contextual link, 4-5; 4-8; 11-1

### D

document, 3-3

DTD tailoring, 10-1

### E

Exchange Table model DTD, 4-6

### F

FMV Base DTD, 4-5

FMV CALS Office, 1-2

FMV Grund-DTD, 1-1

### H

HyTime, 1-1; 4-5; 4-8

### I

independent link, 4-8

information, 2-1

information fragment, 3-5

information module, 3-2; 4-1

information module variants, 4-12

information processes, 2-1

information product, 2-4; 2-6; 4-5

Information types, 4-1

### L

layout oriented coding, 3-1

level of granularity, 4-6

LSAR, 3-3

### M

matériel system breakdown structures, 3-3

### O

object, 3-3

### P

Product model, 2-2

project definable attribute values, 10-1

### R

reference link, 4-9

### S

SGML, 1-1

### T

technical information, 1-1; 2-4

technical publications, 2-3; 2-5
