

## 27. UPDATE CREDIT - REVISION 002

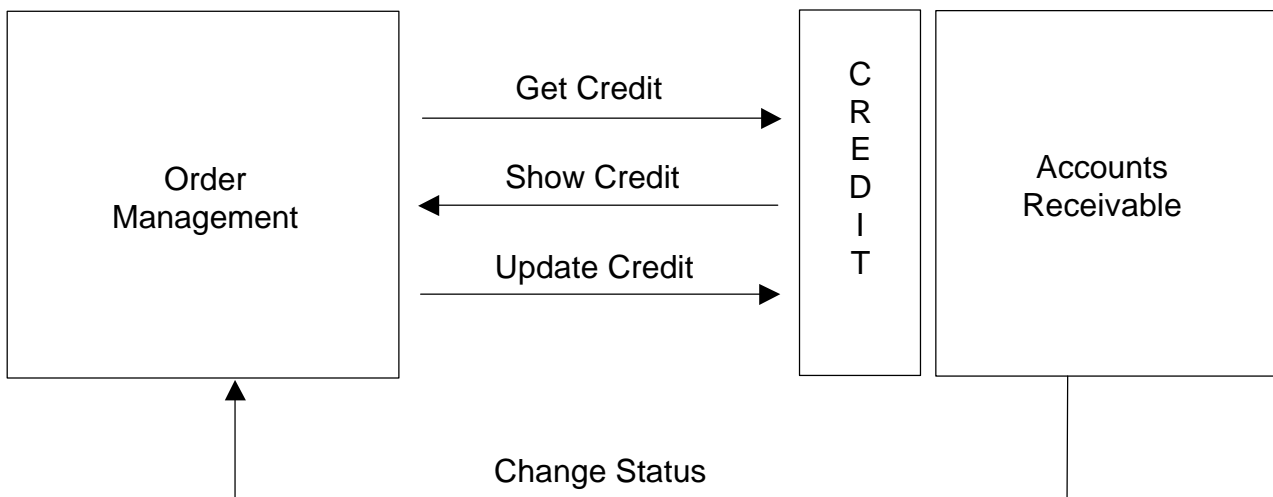

---

### 27.0 Overview

This chapter describes the Business Service Request named UPDATE CREDIT, the Verb being UPDATE and the Noun being CREDIT.

The purpose of the UPDATE CREDIT Business Service Request is to update the Credit Management functionality within the customer order management or the accounts receivable application. The UPDATE CREDIT will also transmit changes in the accounts receivable open item balances to the credit management function of the customer order management application.

The diagram below shows one possible use of the BSR.

---

## 27.1 Update Credit

The UPDATE CREDIT Business Object Document consists of the following Data Type:

1. **CREDITUPDT** - This contains the information necessary to update open order amounts of orders that have been approved or shipped but not yet invoiced into the accounts receivable application. This Data Type is required.

---

## 27.2 CREDITUPDT

The Data Type, “**CREDITUPDT**”, is the only Data Type the Business Service Request “**UPDATE CREDIT**” uses.

Listed are all the Field Identifiers and Segments that are valid for use within the CREDITUPDT Data Type. The first table represents required data.
